

Price of Non-Toxic Fireproof Cable Trays

AI Overview

Non-toxic fireproof cable trays typically range from \$20 to \$150 per meter, depending on material, fire rating, and load capacity.

Price Overview The cost of non-toxic fireproof cable trays varies widely based on material, fire resistance, and structural design:

- Fiberglass-Reinforced Plastic (FRP) Trays:** Non-conductive, corrosion-resistant, and non-toxic, FRP trays are ideal for chemical plants or explosive environments. Prices generally range from \$50 to \$120 per meter depending on width, depth, and load rating.
- Galvanized Steel or Stainless Steel Trays:** Strong and fire-resistant, these trays are widely used in industrial and commercial settings. Non-toxic, powder-coated, or LSZH options cost approximately \$30 to \$100 per meter.
- Aluminum Trays:** Lightweight and corrosion-resistant, aluminum fireproof trays are suitable for data centers and indoor installations. Prices typically fall between \$40 and \$90 per meter.

Factors Affecting Price

- Fire Rating:** Trays certified for 60, 90, or 120 minutes of fire resistance are more expensive due to testing and specialized coatings.
- Load Capacity:** Heavier-duty trays that support more cables or higher weight per meter cost more. Standard load ratings are around 10–20 kg/m, with higher capacities increasing price.
- Coatings and Non-Toxic Features:** Intumescent coatings, LSZH materials, and non-toxic fireproof layers add to the cost but are essential for safety in enclosed or public spaces.
- Customization and Length:** Pre-fabricated lengths, widths, and special shapes (U-shaped, ladder, or mesh trays) influence pricing.
- Supplier Considerations**
 - Bulk Orders:** Many suppliers offer discounts for large quantities, which can reduce the per-meter cost.
 - Manufacturer vs Distributor:** Direct manufacturers often provide lower prices and better quality assurance compared to resellers.
 - Delivery and Installation:** Shipping from major ports (e.g., Qingdao, China) or local suppliers may affect total cost.

Typical Applications Non-toxic fireproof cable trays are used in data centers, hospitals, industrial plants, and high-r...
