

Price of horizontal stripping of optical cable

AI Overview

The price of an optical cable horizontal stripper typically ranges from £15 to £50 depending on the model and precision. Online Retail Options Amazon UK lists a horizontal coaxial cable and fiber optic stripper priced around £15–£20, suitable for cables with peeling diameters of 4.8mm to 7.9mm, offering adjustable blade depth for safe stripping without damaging the fiber. WEICON Precision Stripper on Amazon Germany is a higher-end model designed for fine fiber optic cables (0.125mm diameter) with adjustable length stops and ergonomic design, generally priced higher, around €40–€50 depending on the seller. Manufacturer and Supplier Options Homk Telecom offers fiber optical cable horizontal strippers as part of their professional fiber optic tool range. Prices are not listed directly online, but these industrial-grade tools are typically higher than consumer models, often in the €50–€100 range depending on specifications and order quantity. Farnell UK stocks a wide range of fiber optic strippers from brands like Tempo, Miller, and Jonard Tools. Prices vary by model and precision, with standard horizontal strippers starting around £20–£30 and precision models costing more. Considerations Cable diameter compatibility: Ensure the stripper supports the specific fiber or coaxial cable diameter you plan to work with. Precision vs. general use: Precision strippers for fine fibers cost more but reduce the risk of damaging delicate optical fibers. Delivery and availability: Prices may vary with shipping, import fees, or bulk orders. In summary, for general-purpose horizontal optical cable strippers, expect to pay £15–£30, while precision or industrial-grade models can cost £40–£100 depending on features and supplier.
