

Price quote for galvanized mesh cable trays in Palestine

AI Overview

Galvanized mesh cable trays in Palestine typically range from \$10 to \$30 per meter, depending on material, type, size, and supplier, with bulk orders potentially reducing costs.

Overview of Galvanized Cable Trays Galvanized cable trays are steel trays coated with zinc through a hot-dip galvanization process, providing corrosion resistance and long-term durability. Mesh or perforated designs allow for ventilation and heat dissipation, making them suitable for industrial, commercial, and outdoor installations in harsh environments. They are widely used in power plants, construction projects, and electrical installations to organize and protect cables.

Pricing Factors The cost of galvanized mesh cable trays depends on several factors:

- Material:** Hot-dip galvanized steel is the most common, balancing durability and cost. Stainless steel or aluminum options are more expensive.
- Type and Design:** Ladder trays are more expensive than mesh trays due to higher load capacity, while perforated or mesh trays are cheaper and suitable for lighter wiring.
- Length and Size:** Standard lengths are typically 2.4 meters, with pricing per meter varying based on width and height.
- Supplier and Location:** Local suppliers in Palestine, such as Brilltech Engineers, offer competitive pricing and customization options.
- Additional Costs:** Shipping, installation, and accessories (like fittings and brackets) can affect the total project cost.

Estimated Price Range Based on market analysis, galvanized steel cable trays generally cost between \$10 and \$30 per meter, with mesh trays often on the lower end of this range. Bulk orders or project-specific quotations can reduce the per-meter cost significantly.

How to Obtain a Quote To get an exact price for your project in Palestine: Contact local suppliers such as Brilltech Engineers via their website or phone to request a quotation. Specify your requirements: tray type (mesh, ladder, p...
