

Price quote for steel ladder-type cable trays in the UAE

AI Overview

Ladder-type steel cable trays in the UAE typically range from AED 150 to AED 500 per meter, depending on material, finish, and load capacity.

Overview Ladder-type cable trays are widely used in commercial, industrial, and infrastructure projects across the UAE for supporting and routing electrical cables. They consist of two longitudinal side rails connected by cross-rungs, providing high load-bearing capacity and excellent ventilation for cables. These trays are suitable for long, straight cable runs with minimal bends, and are commonly used in high-rise buildings, data centers, oil and gas facilities, and industrial plants.

Factors Affecting Price

Material and Finish

- Mild Steel:** Standard option, often powder-coated or pre-galvanized, generally more affordable.
- Hot-Dip Galvanized Steel:** Offers superior corrosion resistance, suitable for outdoor or marine environments, typically higher in cost.
- Stainless Steel:** Premium option for highly corrosive environments, significantly more expensive.

Tray Size and Load Capacity

Widths commonly range from 100 mm to 600 mm. Heavy-duty trays designed for high cable loads cost more than standard trays.

Accessories and Customization

Horizontal and vertical bends, reducers, tees, and covers add to the overall cost. Factory-made accessories ensure structural integrity but increase the total system price.

Supplier and Location

Suppliers like West Port Cable Tray, Metar, and Emerald Steel Industries provide competitive pricing across Dubai, Abu Dhabi, Sharjah, and other regions. Bulk orders or long-term contracts may reduce per-meter costs.

Typical Price Range

- Standard steel ladder trays (powder-coated or pre-galvanized): AED 150-250 per meter.
- Heavy-duty or hot-dip galvanized trays: AED 300-500 per meter.
- Accessories (bends, tees, covers): AED 50-200 per piece depending on size and complexity.
