

Prices for Electroplated Zinc Cable Tray Series

AI Overview

Electroplated zinc cable trays typically range from \$50 to \$200 per 10-foot section, depending on size, brand, and supplier. Typical Pricing

Cablofil CF54/150EZ Wire Mesh Cable Tray: A 10-foot, 6-inch wide electroplated zinc tray is available from RS Components and similar suppliers, with prices generally around \$100-\$150 per section depending on distributor and shipping options.

Cablofil CF150/300EZ: This 11.81" wide by 118.2" long tray is listed on Amazon, with prices in the \$120-\$180 range per tray.

L-Com Electro Zinc Plated Wire Mesh Cable Tray: Smaller trays, such as 5.91" wide by 59" long, are sold in packs of 5, with individual tray costs roughly \$50-\$70 each, depending on quantity and accessories.

Wholesale options: Suppliers on Alibaba offer bulk electroplated zinc cable trays, with prices varying widely based on dimensions, thickness, and order volume. Bulk purchases can reduce the per-tray cost significantly, sometimes to \$30-\$60 per tray for standard sizes.

Factors Affecting Cost

Tray Dimensions: Wider or taller trays generally cost more due to increased material usage.

Length: Standard lengths are 10 feet, but custom lengths may increase cost.

Material Quality: Electroplated zinc finish provides corrosion resistance; higher-quality steel or thicker plating can raise prices.

Accessories: Fittings, connectors, and mounting hardware are often sold separately and can add 10-30% to the total cost.

Supplier and Shipping: Prices vary between distributors, online retailers, and bulk manufacturers, with shipping costs affecting the final price.

Summary

For most commercial or industrial applications, expect to pay between \$50 and \$200 per tray, with smaller trays or bulk orders on the lower end and larger, branded trays on the higher end. Accessories and installation hardware should be factored into the total project cost. Electroplated zinc trays are a cost-effective option for corrosion-r...
