

Pricing Table for Fiber Optic Junction Boxes

AI Overview

Fiber optic junction boxes typically range from \$0.25 for small indoor units to \$80 for high-capacity, outdoor, IP68-rated enclosures. Price Ranges by Type and Capacity

Small Indoor Boxes (1–4 cores): Prices start as low as \$0.25–\$5 per piece for mini FTTH or desktop junction boxes suitable for home or small office use, often made from ABS or PC plastics and rated IP45–IP55.

Standard FTTH Terminal Boxes (2–16 cores): Wall-mounted or pole-mounted boxes for residential or small commercial networks typically cost \$2–\$10 per unit, with IP65 protection and compatibility with SC, LC, or FC adapters.

Medium-Density Outdoor Boxes (16–48 cores): Outdoor enclosures with IP65/IP68 ratings, UV-resistant materials, and PLC splitter support range from \$6–\$30, suitable for multi-dwelling units or small telecom deployments.

High-Density or Industrial Boxes (48–288 cores): Large-scale or industrial-grade boxes, including metal or SMC enclosures for data centers or telecom networks, can cost \$50–\$80 per piece, offering robust protection, high fiber capacity, and compatibility with 1x8 or 1x16 PLC splitters.

Factors Affecting Price

Material: ABS, PC, PP, SMC, or metal; outdoor-rated boxes with UV and anti-aging resistance are more expensive.

Protection Level: IP65–IP68 rated boxes for dust and water resistance cost more than standard indoor boxes.

Fiber Capacity: Higher core counts increase price; 2–16 cores are inexpensive, while 96–288 cores are premium.

Features: Fusion splice trays, PLC splitter compatibility, wall/pole mounting, and adapter types (SC, LC, FC) influence cost.

Brand and OEM Services: Established brands like HUBER+SUHNER, COMMSCOPE, or BWN fiber may charge more but offer reliability and warranty.

Where to Buy

Amazon: Offers a wide range of FTTH and fiber distribution boxes from \$2–\$15 for small to medium units.
