

Red light pen fiber optic power meter

Overview

The Y3 Handheld Optical Power Meter & Red Light Pen All-in-One Series is a professional tool designed for continuous optical signal power measurement and fiber continuity testing. Controlled by a high-performance microprocessor, it ensures accurate and efficient fiber-optic diagnostics. Engineered. A Visual Fault Locator (VFL) is a fiber optic testing tool used to identify faults and breaks in fiber optic networks. VFLs typically use a 650nm wavelength red laser that is transmitted through the fiber. This. Check each product page for other buying options. Able to test open, short, cross-connect. Welcome and all the best, my friend! See more product details. Optical fiber red light pen for FTTX networks with 650 nm wavelength, 50 mW output, and universal FC, SC, ST interface.
