

Residential power distribution box keeps tripping

Overview

Your breaker may trip due to circuit overload, short circuits, ground faults, outdated wiring, or a faulty breaker. Your circuit breaker will trip once in a while if it detects an electrical fault. After all, that's what it's. Distribution boxes are the unsung heroes of our electrical systems, quietly managing power until something goes wrong. When they start tripping, overheating, or making strange noises, it's more than just an inconvenience - it's your home's cry for help. But what's causing it?

And more importantly, does it need an expensive fix, or is this something simple?

The good news: Most circuit breaker trips have straightforward explanations, and many don't require major repairs.
