

Router pigtail price

AI Overview

Router pigtails typically range from around 2.38 EUR to higher depending on connector type, length, and quality. Price Overview Router pigtails are short, flexible cables used to connect routers, modems, or hotspots to external antennas, improving signal strength and compatibility between different connector types. Prices vary based on the type of connectors (e.g., TS9, SMA, U.FL, RP-SMA), cable length, and vendor. For example, a TS9 to SMA Female 15 cm pigtail is listed at 2.38 EUR on Getic, offering worldwide delivery. On marketplaces like eBay, prices can fluctuate depending on brand, condition (new or used), and shipping options, with many items available at competitive rates.

Types and Factors Affecting Price

Connector Type: Common types include TS9, SMA, U.FL, and RP-SMA. Specialized connectors or high-quality materials may increase cost.

Cable Length: Shorter pigtails (10–20 cm) are generally cheaper, while longer cables may cost more due to additional materials and potential signal loss considerations.

Quality and Brand: Industrial-grade or fully tested fiber optic pigtails, like those from FS, may be priced higher due to reliability and performance standards.

Quantity: Bulk purchases or packs of multiple pigtails can reduce the per-unit cost, especially for professional or large-scale networking projects.

Where to Buy

Online Retailers: Getic, FS, and WLAN-Shop24 offer a wide selection of pigtails with detailed specifications and delivery options.

Marketplaces: eBay provides a variety of pigtails at competitive prices, often with fast shipping.

Manufacturer Price Lists: Cisco and other networking vendors list pigtail prices in their official price catalogs, useful for enterprise purchases.

In summary, router pigtails are affordable accessories, with prices starting around 2–3 EUR for standard short cables, while specialized or industrial-grade versions may cost more depending on length, connector type, and quality. Choosing the right pigtail depends on your router's connector and the type of external antenna you plan to use.
