

S320 Optical Switch Principle

Overview

HC-S320 optical switch supports matrix all-optical switching ports, adopts MEMS (micro-electromechanical system) technology to intelligently manage single-mode optical fiber signals. HC-S320 is a reliable and cost-effective solution, because it is independent of data speed and protocol, and it can make fiber optic connection without Speed growth or protocol changes are limited, and at the same time, it can provide the flexibility of remote configuration. The HC-S320 optical. Page 9 May 27, 2015 Rev.
