

Seg Relay Protection Setting

Overview

SEG MCDGV4 PROTECTION RELAY | TCP/IP Setting | Activate & Deactivate TCP/IP Protocol | Complete Tutorial ☐☐ In this video, we will learn how to configure TCP/IP communication settings in the SEG MCDGV4 protection relay. Use our Product Configurator to easily customize and configure your SEG protection relay according to your specific needs. Select features, settings, and options to find the perfect match for your system Outstanding solution for reliable protection. The SEG HighPROTEC line. 1 Safety Messages and Proper Use of the WIC1 1. You'll also see how to activate and deactivate the TCP/IP protocol step-by-step. Smart view is a free software by SEG Electronics for easy configuration and evaluation of protection relays like HighPROTEC, High Tech Line 3, Professional Line and WI Line. This makes it a great. Manual IRI1-ER Summary The application of powerful microprocessors with MR- and IR-relays of the HIGH TECH LINE provides a large variety of advantages over power protection systems of the traditional type. The MR-protection relays are based exclusively on the microprocessor technology.
