

Selection Guide for Long-Distance Optical Transceivers QSFP-DD for Metropolitan Area Networks

Overview

This guide explains how to choose QSFP-DD transceivers step by step, helping you avoid costly mistakes and ensure compatibility across your network. Before selecting reach or connector type, evaluate the form factor based on your current switches and long-term upgrade path. In 2025, the optical transceiver market has shifted decisively. Last March, a mid-sized cloud provider ordered 400 QSFP-DD SR8 modules for a new data center. While their switching platform and target speeds were correct, they overlooked a key detail: connector type. QSFP-DD (Quad Small Form-Factor Pluggable Double Density) transceivers double the number of high-speed electrical interfaces in QSFP to achieve 400G Ethernet speeds – and double them again to reach 800G. Network operators are looking for cost-optimized optical solutions that provide increased density and reduced power consumption—across. An engineer-focused, “just tell me what to choose” guide to transceiver selection with architecture, power budget, compatibility, and upgrade plan — designed for 25G/100G today and 400G/800G tomorrow.

100GBASE Optical Transceivers and Cables Portfolio Product Overview The 100G transceiver module portfolio offers a wide variety of high-density and low-power 100G connectivity options for data

Ultimate QSFP Transceiver Guide: Types (40G/100G)

Confused by QSFP types? Decode the differences between QSFP+, QSFP28 (100G), and QSFP-DD. Learn how to select the right speed, connector (SR4 vs

QSFP-DD LR4 400GbE Universal Optical Transceiver

400G QSFP-DD LR4 10 km LC Compatibility Information This module is compatible with the following vendors: • Juniper - QDD-400G-LR4-10 • Arista Networks -

TE CONNECTIVITY OPTICS SOLUTION GUIDE

Designed for hyperscale data centers, AI/ML, High Performance Computing, and telecom applications. Our transceivers (200G, 400G, 800G and 1.6T) deliver reliable performance, flexibility, and scalability.

Three 80km 100G Optical Solutions for Long-Haul Data Center

Three optical transceiver solutions can be used for up to 80km long-haul 100G data center interconnect (DCI): 100G DWDM coherent optics, 100G PAM4 DWDM QSFP28, and 100G ZR4

QSFP-DD TRANSCEIVERS for 400G and 800G | Smartoptics

Many network operators compare QSFP-DD vs. OSFP when selecting transceivers for 400G and 800G deployments. While both form factors support high-speed networking, they differ in design,
