

Selling finished wires and optical cables at prices

AI Overview

You can sell finished wires and fiber-optic cables through scrap metal dealers, B2B marketplaces, and specialized online platforms, with prices depending on material type, quality, and market demand.

Selling Finished Wires Finished wires, such as copper, aluminum, or mixed cables, can be sold to scrap metal dealers or recycling centers. Prices vary based on the metal content, insulation type, and market demand. For example, high-grade copper cables typically fetch higher prices per kilogram than aluminum or mixed-metal wires. Local scrap yards often provide competitive rates and may offer collection services for bulk quantities. Common types of wires accepted include household cables, armoured cables, single-core wires, and data or shielded cables.

Pricing Factors

- Metal type:** Copper > Aluminum > Steel
- Condition:** Stripped wires (without insulation) usually have higher value
- Market trends:** Prices fluctuate daily based on global metal markets
- Quantity:** Bulk sales may attract better rates

Selling Fiber-Optic Cables Fiber-optic cables are in high demand due to the growth of telecommunication infrastructure, data centers, and broadband networks. You can sell both new and used fiber-optic cables to wholesale buyers, IT infrastructure companies, or through B2B marketplaces like Tradewheel or Newegg. These platforms connect sellers with global buyers and allow you to list products with specifications, quantities, and pricing.

Key Considerations

- Market demand:** High-speed internet and data center expansion drive fiber-optic sales
- Cable type and quality:** Professional-grade cables fetch higher prices
- Pricing strategy:** Consider production cost, market trends, and competitor pricing
- Sales channels:** B2B marketplaces, direct contracts with telecom companies, or specialized distributors

Practical Tips

- Assess your inventory:** Separate scrap wires from high-value fiber-optic cables.
- Check curre...**
