

Straight Section of Dutch Cable Tray

From standard **1U** to **8U** sizes to
fully customized **Non-standard** enclosures.

Overview

Straight sections of solid bottom cable trays constructed from single sheet of metal, providing excellent protection from external damage. They are used primarily for intrumantal control, communication and other non-heat producing cables. Also. with the same or different width of the cable run. These fitting are including: elbow, horizontal cross, vertical inside riser, reducers, cover clip, joint connector, horizontal cable tray tee, horizo. Cable trays are ideal for wide variety of applications such as: • Supporting and organizing power cables • Routing cables and wires • Organizing wiring and cables • Supporting and protecting cables • Routing cables in transportation settings • Electrical installations Available size options: • 4"W. Straight sections of ladder type cable trays consist of two longitudinal side rails, connected by individual transverse members, or rungs, which are welded to the side rails or bolted in case of GI trays. This type of cable tray provides maximum ventilation to heat producing cable such as power. Cable trays are a type of cable management system used to support and organize electrical cables and wires in commercial, industrial, and residential settings.
