

Switch 2 Optical Port

AI Overview

A 2-port optical audio switch allows you to connect two digital TosLink sources to a single optical input, automatically or manually switching between them.

Overview
A 2-port optical switch is designed to connect two digital optical (TosLink) sources—such as a TV, game console, CD player, or PC—to one optical input on an AV receiver, soundbar, or home cinema system. This eliminates the need to constantly unplug and replug cables when switching between devices.

Key Features
Inputs and Outputs: Typically has 2 TosLink inputs and 1 TosLink output.
Switching Modes: Can operate automatically, detecting the active signal and switching to it, or manually via a button.
Compatibility: Works with SPDIF optical inputs on AV amplifiers, Hi-Fi systems, and home cinema setups.
Audio Quality: Supports high-quality digital audio, often up to 192 kHz sampling rate.
Convenience: Reduces wear on cables and ports by avoiding frequent reconnections.
Usage Tips
Power-On Priority: The device that is powered on first may take priority. For example, if the TV is on before a CD player, the switch may default to the TV signal.
Cable Requirement: TosLink cables are not included, so you will need to provide your own.
Placement: Keep the switch close to your AV receiver or soundbar to minimize cable length and signal loss.

Ideal Applications
 Switching between a game console and Blu-ray player to a single soundbar.
 Connecting a TV and digital radio to one AV receiver.
 Simplifying setups in home theaters or desktop audio systems where multiple optical sources are used.

Popular Products
Lindy 2 Port Automatic Optical Audio Switch: Offers automatic detection and manual override, widely used in home audio setups.
Techly 2-in-1 Optical Switch: Supports up to 192 kHz sampling rate, suitable for high-fidelity audio systems.

Using a 2-port optical switch is a simple and effective way to manage multiple digital audio sources without constantly swapping cables, ensuring seamless audio switching and preserving your equipment.
