

Ultra-micro Modular Server

Overview

Supermicro's UltraServer is one of the most efficient, reliable, consistent and effective systems available on the market. A high-end enterprise server, it combines power and performance with adaptability and money saving attributes. Supermicro Hyper-Speed and Hyper-Turbo technologies are proprietary board level optimizations for extreme low-latency performance. They support high throughput, low response time, hot-swap NVMe storage and up to 4TB DDR4 RAM. Single AMD EPYC™ 7002. When Supermicro's SuperServer models reach their limits because of ultra-high demands, the latest Ultra Server series comes into play. 5TB of memory in 24 DIMMs, SATA3 with optional SAS3 and NVMe support for increased storage bandwidth, and energy efficient Titanium (96%+) / Platinum. Supermicro SuperStorage offers a wide range of options optimized for large amounts of data storage, from low response NVMe systems to JBOD and JBOF systems designed to economically store large volumes of data. It has the ultra mini tower form factor and can be placed flat or vertically or wall-mounted.

HPE SMART CHOICE ProLiant MicroServer Gen11

Free shipping. Buy direct from HP. See customer reviews and comparisons for HPE SMART CHOICE ProLiant MicroServer Gen11 Ultra Micro Tower Server - 1 x

Power Your Enterprise With the Supermicro Ultra Servers

It comes in both the 1U and 2U form factors and includes hyper performance designs like the Supermicro All-flash Ultra Server. The Ultra server can be

Cooler Master

MasterHUB MasterHUB is a modular control system built for streamers, creators, gamers, and PC enthusiasts who want precision, flexibility, and seamless

Ultra Server | Supermicro Ultra Servers | Future-Proof

The focus of an Ultra Server is to reach a high-performance density within a minimum of space. For that reason, the high performance and the multitude of

Supermicro MicroCloud Servers | Ultra-Dense Modular Platforms

Coltec Supermicro MicroCloud servers pack up to 12 modular server nodes into a single 3U chassis, providing ultra-dense compute for hosting providers, development teams, and organisations needing

Supermicro Data Center Server, Blade, Data Storage,

The premier provider of advanced Server Building Block Solutions® for 5G/Edge, Data Center, Cloud, Enterprise, Big Data, HPC and Embedded markets worldwide.

Supermicro Ultra SuperServers | Supermicro eStore

Shop and configure the latest Supermicro Ultra servers. Highest performance and flexibility for enterprise applications.

Supermicro SuperServer with Intel Optane DC

On this server and others from Supermicro, orange caddies indicate NVMe support. With the SuperServer equipped with ten 2.5" bays, our review

HPE ProLiant MicroServer Gen11

Buy a HPE ProLiant MicroServer Gen11 - ultra micro tower Xeon E-2434 3.4 GHz - 32 GB - HDD 4 TB or other Rack Servers at CDW

Supermicro servers

Modular MicroCloud solution provides the high density, high performance, high efficiency and affordability required for a cloud infrastructure. It can integrate up

Supermicro X13 Server Solutions Brochure, 2023

Open, Modular, Standards-Based Universal GPU System Supermicro X13 Universal GPU systems feature an open, modular, standards-based architecture designed for maximum flexibility. Support for

Ultra Server

Ranging from 1GbE, 10GbE and up to dual 25GbE options; these options allow the Ultra Server family to maximize all aspects of system configuration possibilities

MicroBlade® Server

Density optimized solution in a blade form factor with a 3U/6U enclosure that contains switches, chassis management module for cloud and enterprise data

UltraServer

UltraServer Supermicro Ultra SuperServers are complete, factory-assembled solutions designed for maximum performance, flexibility, scalability and serviceability for demanding IT environments.

HPE ProLiant MicroServer Gen11 QuickSpecs

HPE ProLiant MicroServer Gen11 delivers an affordable compact yet powerful entry level server that you can customize for on-premises, edge, hybrid

HPE ProLiant MicroServer Gen11 server with one

Boost your performance with the HPE ProLiant MicroServer Gen11. Featuring an Intel® Pentium® Gold G7400 processor, 16GB DDR5 memory, and embedded

Supermicro Servers & Storage Solutions | Supermicro

Shop and configure the latest Supermicro servers which includes a diverse range such as Ultra, Mainstream, WIO, SuperWorkStation and SuperStorage designed

Supermicro Ultra Servers

A high-end enterprise server, it combines power and performance with adaptability and money saving attributes. Made from the highest quality components, we

Rack Server Solutions for Enterprise & Data Center

Flexible rack server solutions for a range of enterprise workloads and data center workloads including HCI, media delivery, cloud and Edge

Supermicro Compact Server Systems for Edge AI with

This compact Edge server is considered a mini-1U system and is part of Supermicro's Compact Edge portfolio, which includes a wide range of

Storage Servers Solutions For Enterprise Architectures

Supermicro Storage Servers offer a wide range of NVMe and hybrid storage architectures for apps or services that need to load instantly like 4K video editing.

Military Grade Rugged Servers & Computers | MIL-SPEC Design

Flexible 1U, 2U and 3U form factors and future-proof system architectures offer you the latest multi-core processing options. ZMicro offers four families of customizable rugged servers and computer

Best Mini-ITX motherboards in 2026: My pick from all

June 27, 2025: Added the ASRock Phantom Gaming B860I Lightning Wi-Fi as our pick for the best Intel Mini-ITX motherboard with LGA1851 socket, for those of

Rackmount Edge Servers

Short-depth rackmount edge servers with versatile power, I/O, and temperature ranges deliver CPU performance to space-constrained deployments.

HPE ProLiant MicroServer Gen11

HPE ProLiant MicroServer Gen11 features iLO Silicon root of trust with server management to provide enhanced security, proven reliability and superb

Supermicro Ultra Server

With a wide variety of Ultra Riser options available which includes built-in 1G, 10GBASE-T, 10G SFP+, 40G, and InfiniBand options, plus support for add on SAS 3 HW/SW RAID controllers and additional

Ultra Server

Ultra Server Supermicro server solutions based on the AMD EPYC architecture designed to achieve a new level of optimized performance at a price that competing solutions can't even approach. They
