

Warranty on 8-pin cold connector

Overview

Most warranties for M8 cable connectors cover defects in materials and workmanship. This means that if the connector fails due to a manufacturing flaw, such as a broken pin or a faulty insulation, the manufacturer will replace it free of charge. These connectors come. Our masters of connectology have been delivering drip-free, worry-free quick disconnect couplings for liquid cooling of electronics for over 20 years. We've engineered products. As the connectors are used in cold stores and washdown zones, they must be highly resistant to chemical, thermal, and mechanical contamination. Using a suitable mounting tool ensures a water tight connection between the sensor and cable. Our M8 connector system and M12 connector system provide a full solution that includes connectors, IO modules, and cable assemblies. The Group uses these skills to develop customized solutions and products such as connectors for energy and data transmission applications including, for example, mechanical engineering, rail technology, wind energy plants, factory automation and the.
