

What are the dimensions of a waterproof electrical distribution box in the Dominican Republic

AI Overview

A typical IP65 waterproof electrical distribution box measures approximately 215mm (width) x 210mm (height) x 115mm (depth). Waterproof electrical distribution boxes in the Dominican Republic are commonly designed to meet IP65 standards, ensuring protection against dust and rain, making them suitable for both indoor and outdoor installations. The box is usually made of sturdy ABS plastic, providing impact resistance up to IK08, which ensures durability in harsh environments.

Key Features

- Protection Level: IP65, preventing water and dust ingress
- Material: ABS plastic, impact-resistant
- Applications: Power distribution, control, and protection against overloads or short circuits
- Installation: Suitable for wall mounting or outdoor enclosures

Variations

While the standard dimensions are 215mm x 210mm x 115mm, other models may vary depending on the number of ways (2-way, 5-way, 8-way, 12-way) or manufacturer specifications, such as the EKDB10 series or VIOX HT series, which offer multiple configurations for industrial, commercial, or photovoltaic applications. These boxes are widely used in residential, commercial, and industrial settings in the Dominican Republic, providing reliable protection for electrical circuits in wet or dusty conditions.
