

What is a fire equipment terminal box

Overview

At their core, fire alarm terminal cabinets serve a singular, paramount purpose: to provide a secure, organized, and protected housing for the critical wiring and connections that facilitate the operation of a fire alarm system. The heart of the OBO FireBox is the ceramic connection terminal. Each IP65 F400 Terminal Junction Box enclosure is manufactured from die-cast aluminium with a powder coated. Pepperl+Fuchs provides a specialized portfolio of Ex d (flameproof) and Ex tb (dust protection by enclosure) certified terminal boxes and junction boxes engineered for reliable use in explosion-hazardous areas. These sturdy solutions are certified according to global standards such as ATEX, IECEx. Safely conduct, connect and distribute energy in hazardous areas with R. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times.
