

What is the price of drop fiber optic cable in centralized procurement

Overview

A simple 1-core FTTH drop cable costs around \$0. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Below are typical price ranges (USD per meter) in bulk orders (≥ 5 km):

Insight: Armored cables cost ~50% more than indoor LSZH, but save on maintenance in harsh environments. For ISPs and telecom operators rolling out fiber-to-the-home networks, drop cable procurement mistakes — wrong fiber spec, wrong jacket type, or wrong tension rating — translate directly. Buyers typically pay for cable type, length, and installation; key cost drivers include fiber type, trenching or conduit, and labor. The price landscape varies from basic drop cables to enterprise backbone runs, with per foot and per reel pricing common in estimates. The FIS fiber repair enclosure offers an economical alternative to replacing a subscriber's severed fiber drop cable.
