

Xiaomi Road Access Switch

AI Overview

The Xiaomi Road Access Switch is a wireless smart switch that supports multiple press actions and integrates with Xiaomi smart home systems for automation.

OverviewThe Xiaomi Road Access Switch, often represented by models like the Mi Wireless Switch or Xiaomi Mijia Round Wireless Switch (WXKG01LM), is a compact, battery-powered device designed for smart home automation. It communicates via Zigbee and can be paired with a Xiaomi Smart Home Hub 2 or compatible Zigbee integrations like ZHA for advanced automation.

Key Features**Battery Life:** Estimated 2 years using a CR2032 battery with 20 clicks per day at room temperature. Performance may decrease in low temperatures.

Supported Commands: The switch supports multiple actions including single press, double press, triple press, quadruple press, button hold, and multiple presses (more than five clicks) allowing flexible automation.

Integration: Works with Xiaomi Home Hub, Zigbee Home Automation (ZHA), and can trigger scenes, control devices, or execute custom actions based on the type of press.

Customization: Users can assign different actions to each press type, such as controlling lights, skipping music tracks, or activating smart home scenes.

Usage TipsEnsure the switch is paired with a compatible hub for full functionality. Place the switch in a location with stable Zigbee connectivity to avoid missed commands. Customize actions through the Xiaomi Home app or ZHA integration to maximize automation potential.

For outdoor or road access applications, ensure the switch is protected from extreme weather to maintain battery life and performance.

Applications**Home Automation:** Control lights, smart plugs, or scenes with a single or multiple presses.

Access Control: Can be used to trigger gates, doors, or security systems when integrated with smart relays or automation platforms.

Entertainment: Assign actions like media control (play, pause, skip) for convenience.
