

Xiaomi Router Pro Dual Fiber Optic

Overview

Xiaomi has expanded its router lineup with the launch of the BE10000 Pro. The new high-end router supports AI dual 10G wired connections, tri-band Wi-Fi 7, and personal storage expansion. It is priced at 1,699 yuan (\$238) in China. The BE10000 Pro uses a vertical tower-style. Powered by the Qualcomm® Networking Pro A7 quad-core platform and a next-generation AI network engine, the router delivers three core capabilities: AI interference resistance, AI Mesh roaming and AI power management for truly intelligent routing. The BE10000 Pro uses a vertical tower-style design with a matte. HIGH SPEED & PERFORMANCE Supports speeds up to 1200Mbps with dual band (2. 4GHz and 5GHz) to ensure a fast and stable connection for all your online activities. Wide Coverage Equipped with four high gain external antennas that improve signal coverage and strength, providing optimal range throughout. Fibre-optic full gigabit router, delivering faster connection speeds The Xiaomi Router AC1200 includes one gigabit WAN port and two gigabit LAN ports, easily achieving network speeds of 100Mbps and above. That said, it's already pretty obvious that the Xiaomi BE10000 Pro targets rather demanding users.
