

Yellow optical fiber cable price

AI Overview

Yellow optical fiber cables typically range from around \$150 to \$300 for a 1000-foot 6-strand singlemode spool, with wholesale and bulk options available at varying prices. Retail Pricing For standard indoor distribution cables, a 1000-foot spool of 6-strand singlemode yellow fiber optic cable is priced around \$150 to \$200 on platforms like Amazon and CableWholesale . These cables are designed for long-distance indoor runs, support high-speed data transmission, and are riser-rated with flame-retardant yellow PVC jackets. They are compatible with 1310nm and 1550nm wavelengths and meet ITU-T G.652.D standards . Wholesale and Bulk Options For larger projects or bulk purchases, suppliers like Alibaba and FiberOptics4Sale offer yellow optical fiber cables from multiple manufacturers, including Corning, AFL, and Mohawk . Prices in wholesale markets vary depending on: Cable type: singlemode vs multimode Strand count: 4, 6, 12, or more fibers Length: 500 ft, 1000 ft, or longer spools Outdoor vs indoor rating: armored, direct burial, or riser-rated Wholesale prices can be lower per foot than retail, especially for bulk orders, but exact pricing requires contacting suppliers for quotes based on specifications . Factors Affecting Price Fiber Type: Singlemode (9/125 μ m) cables are generally more expensive than multimode. Strand Count: More fibers per cable increase cost. Jacket Material and Rating: Flame-retardant, UV-resistant, or armored jackets add to the price. Length: Longer spools reduce per-foot cost but increase upfront expense. Supplier and Brand: Premium brands like Corning may cost more but offer higher quality and compliance with international standards . For precise pricing, it is recommended to check current listings on Amazon, Mouser, CableWholesale, or Alibaba, as prices fluctuate based on demand, shipping, and supplier inventory .
